

iDCS Series

Keysets with Distinctive Design

The bold iDCS keyset series is the perfect blend of design, functionality and style. iDCS keysets are another award winning result of Samsung's \$7.9 billion dollar commitment to research and development. These keysets feature the latest in DSP technology, external microphones, and a board room quality speakerphone. iDCS Keysets come standard with the Terminal Status Indicator (TSI), a bright, tri-color LED light that provides immediate visual status - even from across the room; an incredibly useful feature in today's hectic office environment.

Flexible and highly functional, the iDCS keysets support Samsung's elite line of systems (including iDCS 16 Release 2). Additional features of the iDCS keysets include large, easy-to-use dial buttons, programmable keys, add-on modules for added flexibility, and either an analog or a digital daughterboard which doubles the capacity of station ports. Samsung's iDCS keysets are the highest quality telecommunications solution - the perfect unity of sight and sound for your business.

Samsung Means Business

Your Business Lifeline

8-Button Speakerphone

Reduced in size, not power, the 8-button Speakerphone is the most cost-effective solution for companies that do not need sophisticated optional features, but still want the confidence of knowing they can handle high volume traffic with efficiency.

18-Button Speakerphone

The 18-button Speakerphone is ideal for the rapidly growing company who is cost conscious. Offering the same advanced features as the 28-Button Speakerphone, it is recommended for businesses who do not yet need the extensive capabilities the 28-button model offers.

28-Button Speakerphone w/ 14 Button AOM

The 28-button Speakerphone is ideal for the established companies whose business is telephone intense. From the receptionist to the busy executive, this keyset does it all. Add the optional 14 button module to the 18 or 28 button keyset for even more flexibility.*

28-Button Speakerphone w/ 64 Button AOM

Samsung's Add-On Module offers 64 additional fully programmable buttons, providing any keyset with incredible versatility. Add up to two 64-button Consoles for supreme call coverage*.

28-Button Speakerphone w/ Microphone

Add the full duplex speakerphone option, to convert the 18 or 28-button Speakerphones into a board room speakerphone with up to 3 external microphones.*

28 Button Speakerphone - Light Gray

All iDCS keysets and Add-On Modules also available in Light Gray.
